Introducing CollarCare Light™:

SPLINTS AND IMMOBILISATION

CollarCare Light™

Arm Slings

CollarCare Light™ arm slings are designed to provide support to the clavicle area or to provide full immobilisation of the shoulder.

The CollarCare Light™ arm sling is particularly suitable for CVA patients requiring long term limb support and immobilisation.

The “O” buckle design allows the CollarCare Light™ arm sling to be adjusted to suit a large variety of applications. The CollarCare Light™ arm sling also includes a circumferential waist strap allowing the arm to be fixed to the body for complete shoulder immobilisation. CollarCare Light™ arm slings can be easily fitted by patients without assistance.

CollarCare Light™ arm slings are available in 4 sizes for application on a variety of arm sizes

Code	Application	Measurement (Height x Width)	Size
SM040	Shoulder Immobiliser	16 x 32cm	Small
SM050	Shoulder Immobiliser	19 x 39cm	Medium
SM060	Shoulder Immobiliser	21 x 44cm	Large
SM070	Shoulder Immobiliser	24 x 50cm	Extra Large
