Introducing Scarban®:

Making scars fade

Professional Silicone Sheets

The use of silicone sheets in professional scar treatment is scientifically supported and has become the preferred therapy in professional scar care.

Scarban® works on hypertrophic, keloid scars and to prevent scars. It takes about 2-4 months to see a difference in your scar and you can continue treatment until the maximum result is achieved.

Scarban® silicone sheets are available in Elastic (High profile 1.4mm) and Light (Low Profile 0.7mm).

WOUND CARE

sutherlandmedical

Scarban®

Features:

- Intensive therapy – highly effective (High Profile version)
- Suitable for small and large areas of the skin
- Contains very high UV protection (SPF50)
- Can be cut to fit your application
- Includes special cleaning soap
- Light (low Profile version) ideal for sensitive skin
- Scarban® sheets are self-adhesive and washable

Scarban® Velvet Touch

Features:

- Highly concentrated silicone gel
- Fast drying / non sticky
- Not visible when dry
- Can be combined with make-up
